Stroke:	180mm	Consumption:	208g/kw.h

## Product Features

- ◆ Electronic unit pump, four-valve structure, turbocharged & intercooled, and Yuchai combustor technologies are adopted for realizing sufficient air intake, full combustion and low fuel consumption, less emission and fast and high-quality loading.
- ◆ High-quality alloy cast iron cylinder block of reinforced grid structure with cambered surface, high-strength vermicular iron cylinder head, dual protection anti-impact cylinder gasket structure, and self-developed cooling technology for the bottom of the cylinder head are adopted, which ensure high reliability.
- ◆ The Yuchai proprietary carbon-scraping self-cleaning technology is adopted for ensuring low Lubricating oil consumption.
- ◆ Electric pre-supply oil technology is adopted, which effectively protects kinematic pair and improves the service life of engine.
- ◆ The crankshaft is made of high-quality alloy steel by using all fiber extrusion forging process, and the journal and circular bead are subject to quenching heat treatment for improving wear resistance and prolonging service life.
- ◆ The structure of one head for one cylinder is adopted; maintenance window is set at the side of the engine body, which ensures easy maintenance.

## Control Panel

The control module gives digital readouts of:

Generator voltage;  
Output frequency;  
Engine speed;  
Battery voltage;  
Engine hours run.

The **control panel** is an Digital Control Module suitable for a wide variety of single, diesel or gas, gen-set applications.

Monitoring an extensive number of engine parameters, the module will display warnings, shutdown and engine status information on the back-lit LCD screen and illuminated LEDs.

**The control module has indicators for failure information:**

Over speed/Low speed,  
Emergency stop  
Low oil pressure;  
High water temperature  
Failure to start  
Battery charger failure
